

JULIEN DE SMEDT
Principal Director, Founder
Architect MAA

E office@jdsarchitects.com

BIOGRAPHY

Julien De Smedt is the founder and director of JDS Architects based in Copenhagen, with offices in Brussels and Oslo. A designer and architect whose work is known in Europe and abroad, Julien's commitment to the exploration of new architectural models and programs has helped to re-energize the discussion of architecture in Denmark with projects such as the VM Housing Complex, Maritime Youth House and Stavanger Concert Hall. Born in Brussels to French art enthusiast Jacques Léobold and Belgian artist Claude De Smedt, Julien attended schools in Brussels, Paris, and Los Angeles before receiving his diploma from the Bartlett School of Architecture. Before founding JDS Architects, Julien worked with OMA, Rotterdam and co-founded in well known architecture firm PLOT in Copenhagen.

Among other awards and recognitions, Julien received the Henning Larsen Prize in 2003 and an Eckersberg medal in 2005. In 2004 the Stavanger Concert Hall was appointed World's Best Concert Hall at the Venice Biennale, and the Maritime Youth House won the AR+D award in London and was nominated for the Mies van der Rohe award. In 2007 Julien also won a large international competition for the new Holmenkollen Skijump in Oslo, and in 2008 he won the Kalvebod Brygge competition in Copenhagen.

Julien has been a guest professor at Rice University in Houston, Texas and the University of Kentucky. Among other places, Julien has also lectured at the Sendai Mediatheque in Japan, the Architectural Association of Ireland, the Tate Modern in London, the Mies van der Rohe Pavilion in Barcelona, the Pavillon de l'arsenal in Paris, the McGill University in Montreal, Yale University in New Haven, and both SciArc and USC in Los Angeles.

Julien's work has been exhibited in numerous locations around the world, such as Copenhagen, Toronto, Paris, New York City, and Sao Paulo. The first monograph of JDS Architects, entitled PIXL TO XL, was published by Damdi in December 2007 and is currently available.

MAJOR PROJECTS
